

App. No. 10/605,764
Amendment dated September 25, 2006
Reply to Office action of August 23, 2006

REMARKS

Summary of Amendments

In the specification, numerous instances of the letter theta being garbled, most being instances in which "□" appeared instead of "θ," have been corrected. These amendments amount to formal corrections only; of course no new matter has been added. The garbling of "θ" would seem to be an artifact of the submission of the present application by means of the USPTO's old Electronic Filing System. When Applicant's representative submitted the present application, versions of the specification printed out via browser display and via "ePAVE" (the USPTO's proprietary electronic submission software in the old EFS)—and currently still viewable—on Applicant's end contained no illegible text.

Favorable action by the Examiner at an early date is solicited.

Respectfully submitted,

September 25, 2006
